

APOS brief report

Ernst Zahn, APOS/BEV - Austria
EUPOS, 7th EUPOS technical meeting 11/2021

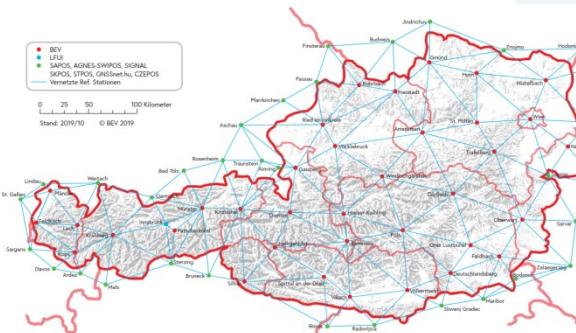

Since 1st Feb. 2021: APOS Free RTK for „Precise Farming“
 > First step to APOS mass application established

New server/system concept:
 CORS data > caster > networking >
 DMZ: distribution >
 processing (via worker) >
 provision for users (netscaler)

Automated registration/customer management
 process via Agricultural Market Austria and BEV

APOS Network

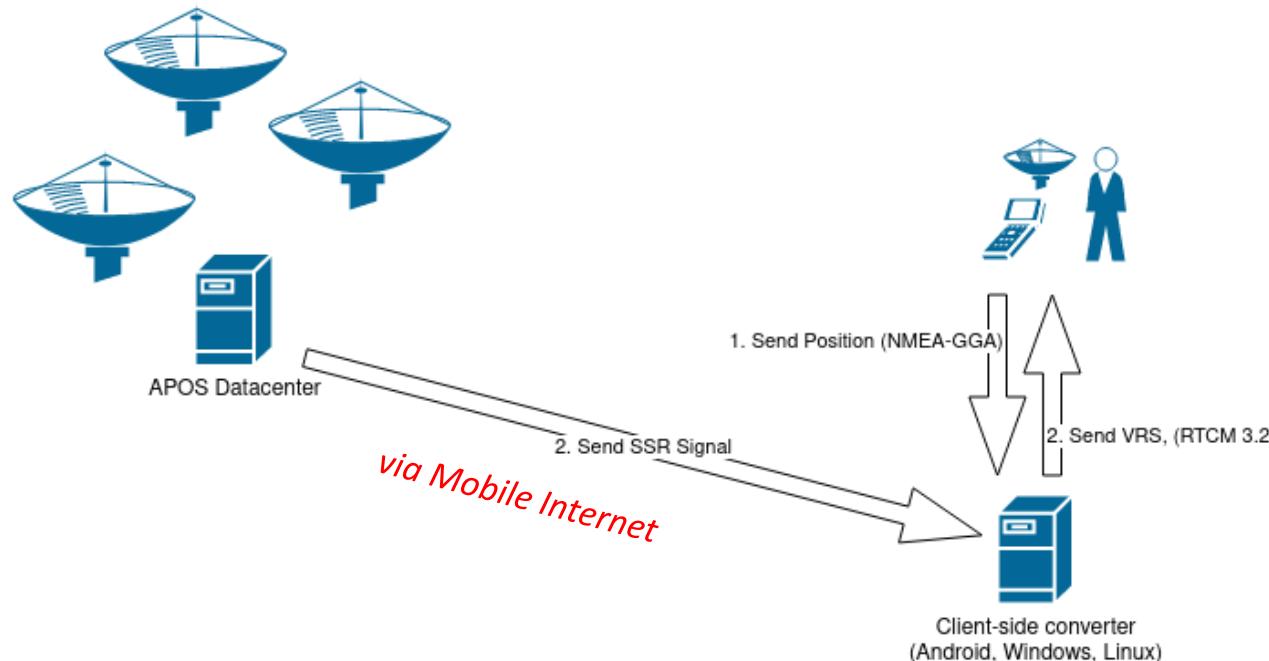

71 GNSS Reference stations

- 37 (Austrian)
- 34 (foreign)
- 1 x IGS / 4 x EUREF
- ETRS89 – representation in Austria
- Brands (Austria): Trimble Alloy, Leica GR30, Septentrio PolaRx5

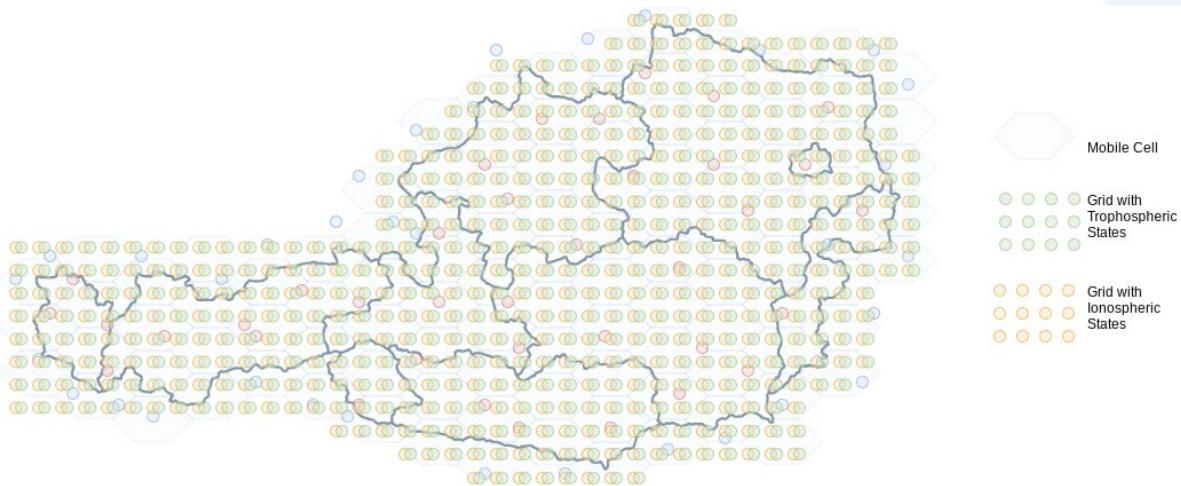

Outlook (as of end 2021...):
APOS Broadcast – testservice

Future goal: State infrastructure for all
 customers!

APOS-Broadcast – Prototype (Converter app / Direct chip processing ...)

Midterm concept: APOS – „Broadcast“ (e.g. via mobile cells, ...)

- Send smaller grids per cell
- Overlapping grid with identical grid points
- Each cell receives a partial grid
- Lower Bandwidth
- processable by "cheaper" receivers?

...transmission of partial parts of the grid, „Cell-VRS“, ...

Add. midterm concept: „Cell – VRS“
